Flexible + Simple + Innovative

Contractors choose ICC products for flexibility, premium quality, and affordable prices. ICC introduces three different series of modules to customize Net.Media™ Centers allowing for maximum space savings and cost flexibility. Each series is designed to fit the specific contractors needs. Choose from the Premier series for maximum durability, the Deluxe series for light weight and premium look, and the Compact series for cost effectiveness at the forefront. Best of all contractors can mix and match for the best installation solution!

Complete solutions!

ICC offers the widest selection of wall outlet solutions available! Complete installations with a wide variety of faceplates and modular connectors; available in different styles and colors to match any home décor.

Residential Structured Cabling Solutions

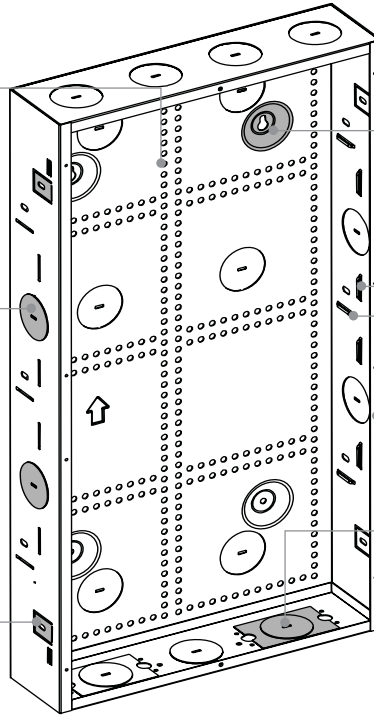

Net.Media™ Centers

NEW Net.Media™ Centers

ICC's newly enhanced 14", 21", 28", and 42" Net.Media Centers have an innovative mounting system that allows for horizontal and vertical mounting for space saving flexibility and ease in configuration.

2.5" keyed knock-outs are designed on the top, bottom, and sides of the enclosure for cable channeling. They can easily be removed with a flat head screw driver.

Spacing between wall studs are not the same, so ICC's Net.Media Centers are designed with mounting tabs on both sides to make installations easy.

Surface screw mounts have a recessed design. It prevents mounting screws from interfering with modules mounting over them.

Cable management bridges and ring holes are designed on the sides of the enclosures. Use ICC's Velcro® or nylon cable ties and cable management rings to make cable routing clean and easy.

All Net.Media Centers are UL® listed to ensure high quality.

110 power knockouts with 2.5" keyed knock-outs are designed on the bottom of the enclosure. Electrical duplex box can be added to provide power to active devices; such as hubs, routers, and amplifiers. (Electrical duplex boxes not included)

14" Net.Media Center
ICRESDC14E

14" enclosure with hinged door

- Up to 8 mounting spaces
- 14.25" W x 14" H x 3.68" D
- 2 knockout for AC power outlet
- 4 top, 3 bottom and 4 rear cable access knockouts, 1 per side
- 4 side cable management points
- Ideal for small installations with limited space in single family and multi-unit housing

21" Net.Media Center
ICRESDC21E

21" enclosure with hinged door

- Up to 12 mounting spaces
- 14.25" W x 21" H x 3.68" D
- 2 knockout for AC power outlet
- 4 top, 3 bottom, 4 rear, and 2 per side cable access knockouts
- 8 side cable management points
- Great for medium installations in multi-family homes with small home offices

28" Net.Media Center
ICRESDC28E

28" enclosure with hinged door

- Up to 18 mounting spaces
- 14.25" W x 28" H x 3.68" D
- 2 knockouts for AC power outlet
- 4 top, 3 bottom, 6 rear, and 2 per side cable access knockouts
- 12 side cable management points
- Perfect for large installations with ample room for future upgrades and expansion

42" Net.Media Center
ICRESDC42E

42" enclosure with hinged door

- Up to 26 mounting spaces
- 14.25" W x 42" H x 3.68" D
- 2 knockouts for AC power outlet
- 4 top, 3 bottom, 6 rear, and 2 per side cable access knockouts
- 12 side cable management points
- Designed for high-end custom installations with ample room for future upgrades and expansion

Net.Media™ Solutions

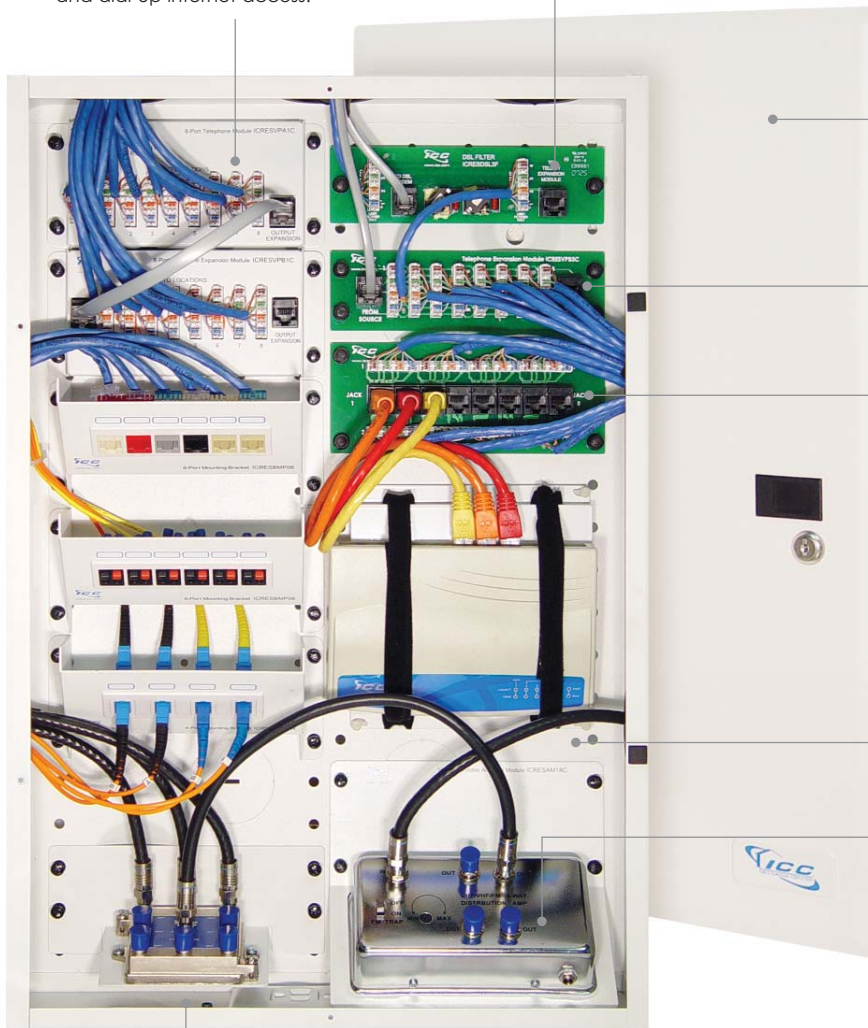

Multi-Line Telephone

Choose to distribute voice to any room in the home for multiple telephones, fax machines, and dial-up internet access.

DSL Internet Access

Filter out data noise from all phones throughout the house with a single unit.

UL Listed

All ICC Net.Media Centers are UL® listed to ensure high quality.

Telephone Expansion

Add 8 additional telephone extensions per line.

Computer Networking

Network the entire home with data for multi-user computers, printers, scanners, and cable modem or DSL internet access.

High Speed Internet Access

Category 5e component-rated compliant data modules offers high speed internet access and allows you to transfer and share intensive graphic files or libraries over the network.

Universal Brackets

Hold routers, hubs/switches, cable modems, and other electronic equipment.

Cable Signal Amplification

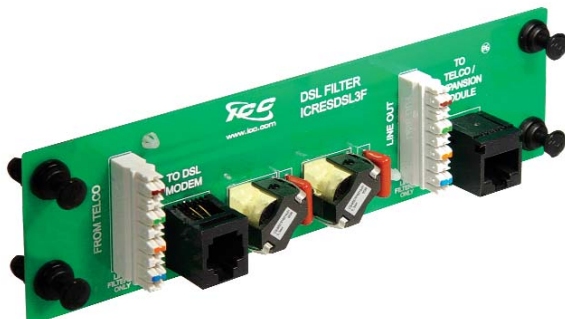

Boost low cable signals to improve video quality with ICC's powered video amplifiers.

Multi-Room Video

ICC offers a wide range of video modules to distribute satellite, cable TV, and video to multiple rooms within the home.

Save with ICC™ ICC's **NEW** DSL filter module eliminates data noise out of all phone lines!

Don't use multiple DSL filter modules for each phone line outlet; use ICC's new DSL filter module for all your needs!

It serves as an ADSL noise filter, voice pass through, and as a voice expansion module ideal for customers who rely on telephone and data service through ADSL. The all-in-one design helps reduce cost, service complexity, and installation time. It provides as an effective way to filter data noise out of all phones throughout the house with a single unit, eliminating the need for DSL filters that would normally be required at every phone outlet. It supports 4 incoming lines and 4 outgoing lines.

Part Number	Description
ICRESDSL3F	DSL Filter Module, 1/2 mounting space

Net.Media™ Solutions

Save with ICC™ Choose the right connectivity modules to fit your needs!

Premier Modules

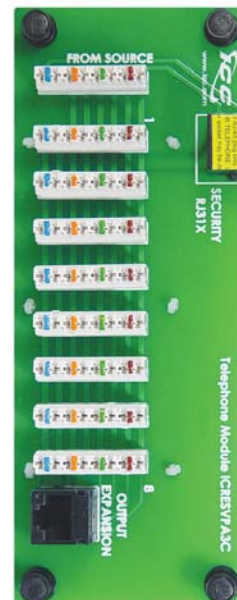

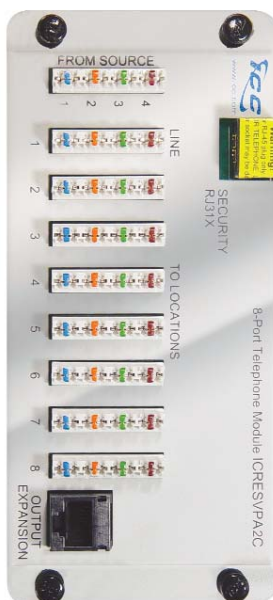

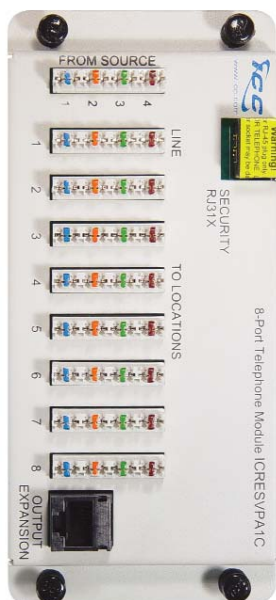

For high durability and long lasting use.

Deluxe Modules

Superior performance with light weight ABS plastic for a premium look.

Compact Modules

Same performance; designed without brackets for a cost-effective solution.

Premier Telephone ICRESVPA1C

- Telephone module with RJ-31X
- 8-Port bridged
- Supports up to 4 incoming lines with 8 extensions per line
- 1 mounting space

Premier Telephone Expansion ICRESVPB1C

- Telephone expansion module
- 8-Port bridged
- For additional 8 extensions per line
- 1 mounting space

Premier Data ICRESDPA1C

- Data module CAT 5e
- High-speed gigabit data connectivity
- Support up to 8 computers
- 1 mounting space

Premier Video ICRESAV42C

- Video splitter module
- 1 input x 4 output
- Split video signals for up to 4 locations
- 2 GHz, 5-2300 MHz bandwidth
- 1 mounting space

Premier Video ICRESAV62C

- Video splitter module
- 1 input x 6 outputs
- Split video signals for up to 6 locations
- 2 GHz, 5-2300 MHz bandwidth
- 1 mounting space

Premier Video ICRESAV82C

- Video splitter module
- 1 input x 8 outputs
- Split video signals for up to 8 locations
- 2 GHz, 5-2300 MHz bandwidth
- 1 mounting space

Premier Telephone and Video ICRES8V42S

- Combination telephone and video splitter module
- 8-Port bridged telephone
- 1 input x 4 outputs video splitter, 2 GHz
- 1.5 mounting space

Premier Telephone and Video ICRES8V62S

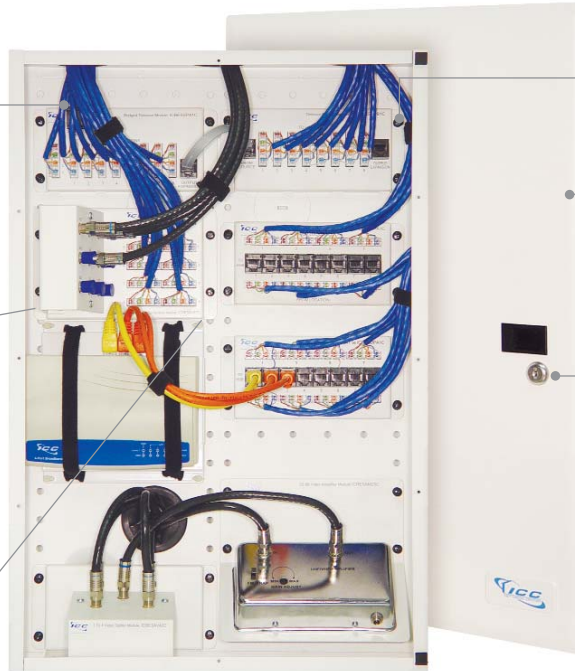

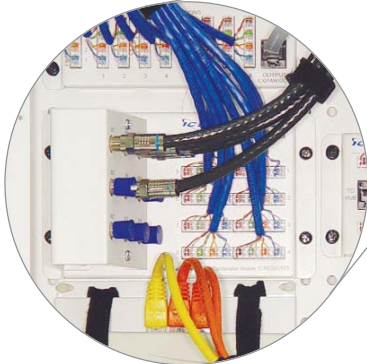

- Combination telephone and video splitter module
- 8-Port bridged telephone
- 1 input x 6 outputs video splitter, 2 GHz
- 1.5 mounting space

Premier Net.Media™ Solutions

ICC offers the premier series Net.Media Center modules that are designed with metal brackets for high durability and long lasting use.

Premier combination telephone and video splitter modules have a compact design to save space.

Get faster installations and system changes with our new snap and lock push pin design.

Doors have a hinge design and are reversible; allowing the door to swing open left or right.

Add an optional door lock on the enclosure door to prevent unwanted access.

Complete the Solution!

Premier Telephone and Video ICRES8V82S

Combination telephone and video splitter module

- 8-Port bridged telephone
- 1 input x 8 outputs video splitter, 2 GHz
- 1.5 mounting space

Deluxe Telephone ICRESVPA2C

Telephone module with RJ-31X, plastic

- 8-Port bridged
- Supports up to 4 incoming lines with 8 extensions per line
- 1 mounting space

Deluxe Telephone Expansion ICRESVPB2C

Telephone expansion module, plastic

- 8-Port bridged
- For additional 8 extensions per line
- 1 mounting space

Deluxe Data ICRESDPA2C

Data module CAT 5e, plastic

- High-speed gigabit data connectivity
- Support up to 8 computers
- 1 mounting space

Deluxe Video ICRESAV42L

Video splitter module, metal

- 1 input x 4 outputs
- Split video signals for up to 4 locations
- 2 GHz, 5-2300 MHz bandwidth
- 1 mounting space

Deluxe Video ICRESAV62L

Video splitter module, metal

- 1 input x 6 outputs
- Split video signals for up to 6 locations
- 2 GHz, 5-2300 MHz bandwidth
- 1 mounting space

Deluxe Video ICRESAV82L

Video splitter module, metal

- 1 input x 8 outputs
- Split video signals for up to 8 locations
- 2 GHz, 5-2300 MHz bandwidth
- 1 mounting space

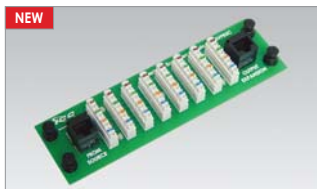

Compact Telephone ICRESVPA3C

Telephone module with RJ-31X

- 8-Port bridged
- Supports up to 4 incoming lines with 8 extensions per line
- PCB design
- 1 mounting space

Net.Media™ Solutions

Compact Telephone Expansion ICRESVPB3C

- Telephone expansion module
- 8-Port bridged
- For additional 8 extensions per line
- PCB design
- .5 mounting space

Compact Data ICRESDPA3C

- Data module CAT 5e
- High-speed gigabit data connectivity
- Support up to 8 computers
- PCB design
- 1 mounting space

Compact Video

- ICRESVS21G 1 GHz
- ICRESVS22G 2 GHz
- Passive video splitter module
- 1 input x 2 outputs
- Split video signals for up to 2 locations
- Less than 11 dB loss

Compact Video

- ICRESVS41G 1 GHz
- ICRESVS42G 2 GHz
- Passive video splitter module
- 1 input x 4 outputs
- Split video signals for up to 4 locations
- Less than 11 dB loss

Video Amplifier

ICRESAM18C

- Drop amplifier module, metal
- 1 input x 4 outputs
- Amplification for low signal strength
- 18 dB gain, 900 MHz bandwidth
- 2 mounting spaces

Video Amplifier

ICRESAM25C

- Drop amplifier module, metal
- 1 input x 1 output
- Amplification for low signal strength
- 25 dB gain, 50-900 MHz bandwidth
- 2 mounting spaces

Video Amplifier

ICRESAM15C

- Bi-directional amplifier module
- 1 input x 1 output
- 15 dB forward; 0 dB reverse gain
- Bi-directional traffic with 5-40 MHz return
- 2 mounting spaces

Video Amplifier

ICRESAM38C

- Bi-directional amplifier module
- 3 inputs x 8 outputs
- 3 dB forward; 1.5 dB reverse gain
- Bi-directional traffic with 5-42 MHz return
- 2 mounting spaces

Satellite Video

ICRESMS34C

- Multi-switch module
- 3 inputs x 4 outputs
- Connects satellite to video inputs
- Input frequency from 40-2400 MHz
- 1.5 mounting space

Power Strip, 7 Outlets

ICRESPSB07

- Power strip surge protector
- 7 outlets
- Protects from power surges caused by lightning and other electrical occurrences
- 2 mounting spaces

Universal Bracket

ICRESDCBUM

- Universal bracket
- Designed to hold routers, hubs/switches, cable modems, and other electronic equipment
- Velcro® ties included, **4 pcs.**
- 3 mounting spaces

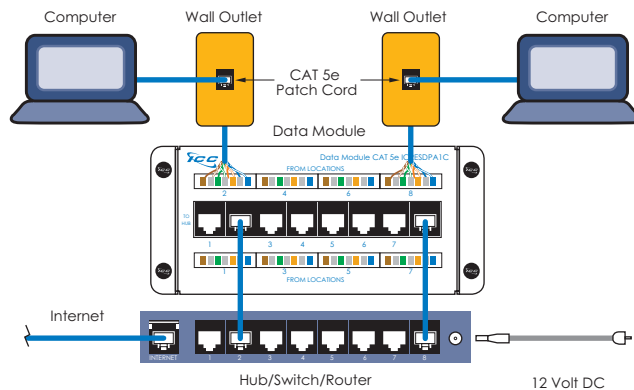

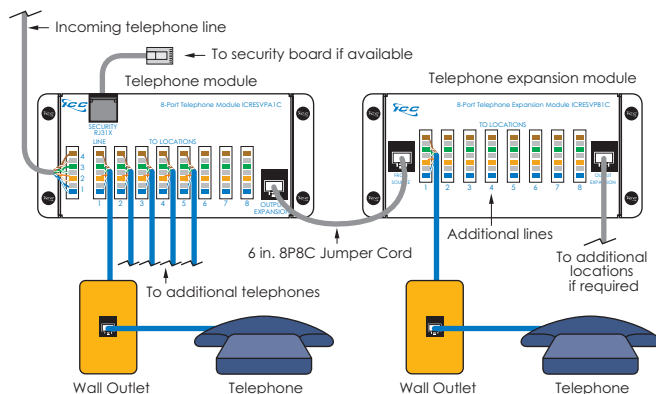

Cable Management Ring

ICCMSCMPR1 Single, 1.70"

- ICCMSCMPR2 Single, 3"
- For vertical cable management
- Mounts inside enclosures on the left and right side panels
- Includes mounting screws

• 10 pcs./bag

Save with ICC™ Customize panels with a wide selection of ICC modular connectors!

With ICC's multi-media patch panels you can use any of ICC's data, voice, audio, video and fiber optic modular connectors for most cost-effective multi-media solution. Contractors now have the advantage to make quick adds, moves, and changes to their installations.

Key Features:

- Customize with any ICC modular connector for true multi-media
- Data modular connectors for computer networking
- Audio speaker modular connectors for whole house audio
- Video modular connectors for satellite and cable TV
- Fiber optic modular connectors for high-speed internet access

Mini Net.Media™ Centers

Save with ICC™

ICC's Mini Net.Media Center fills the need for a compact and versatile distribution point saving space and installation time.

Comes kitted with voice, data, video for fast installations!

Designed to be surface mounted with dual side access for easy cable entry and exit.

Provides an excellent solution for condos, town homes, smaller homes, and for remodeling installations.

Easy snap-in design!

For quick and easy adds, moves and changes.

Mini Net.Media Center ICRDSMMBK1

Mini center kitted Includes:

- Cover and base
- Telephone module
- CAT 5e data module
- 1x4 splitter module

Mini Net.Media Center ICRDSMMB03

Mini center Includes:

- Cover and base
- Modules are not included

Mini Telephone ICRDSVPA10

Telephone module with RJ-31X

- 8-Port bridged
- Supports up to 4 incoming lines with 8 extensions per line
- 1 mounting space

Mini Data ICRDSDPA10

Data module CAT 5e

- High-speed gigabit data connectivity
- Support up to 8 computers
- 1 mounting space

Mini Video ICRDSAVP4B

Video splitter module

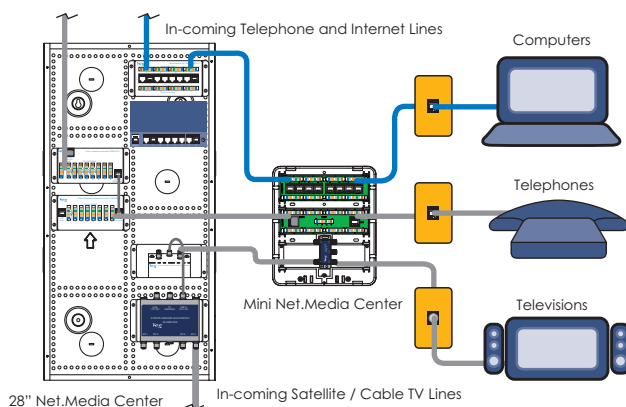

- 1 input x 4 output
- Split video signals for up to 4 locations
- 5 MHz - 1 GHz bandwidth
- 1 mounting space

F-type Termination Caps ICRDSTC75F

- 75 Ohm
- Caps are designed to terminate unused CATV splitter ports
- 20 pcs./bag

Save with ICC™ Create a Multi-User Telecommunication Outlet Assembly with the Mini Center!

A MUTOA cabling design allows horizontal cabling to remain intact when the living area layout is changed. The mini center can be used as a MUTOA offering a combination of media services to an area where multiple equipment are located; such as computers, faxes, telephones, printers, televisions, and more. Ideal for the home office to make changes to connections easy.

Perfect for Garages

Install in Basements

Ideal for Remodeled Homes

Modular Connectors

Save with ICC™ ICC modular connectors; fastest to terminate within the industry!

Easy snap-in design!

ICC offers contractors a wide selection of CAT 6, CAT 5e, and voice modular connectors!

- Fastest to terminate
- Exceeds industry standards
- Performance certified
- 50 micro-inch gold plating
- Use with the ICC's widest selection of faceplates available

Now Available in Bulk Pack 25-Pack! see page 18

Easy (EZ) for Fast Termination

- PCB design eliminates the need for split pairs reducing installation time.

High Density (HD) for High Performance

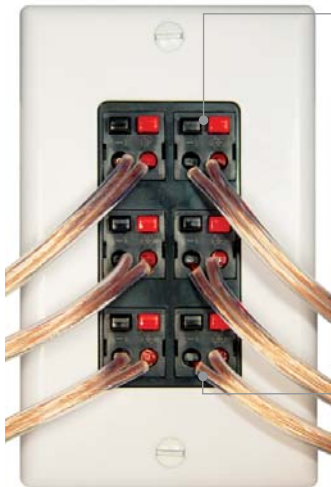

- Slim line design permits reduced spacing between ports; ideal for high density systems.

Modular Connectors

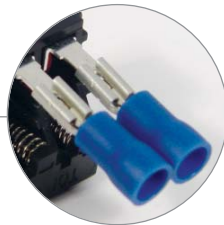

Audio Speaker Modular Connectors

Save with ICC™

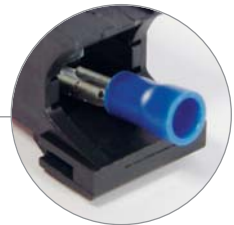

ICC's dual audio speaker modular connector **saves up to 50% space** within the faceplate; it's compact design and reduced push pins maximizes space usage allowing smaller wall plates to be used.

The connector is designed with two (2) rear "fast-on" crimp connectors for quick installation.

The audio speaker spring clip modular connector has a simple spring design that makes it quick and easy to insert speaker wires and to make swift changes.

Both connectors are designed with one (1) rear "fast-on" crimp connector for quick installation.

Audio/Video Modular Connectors

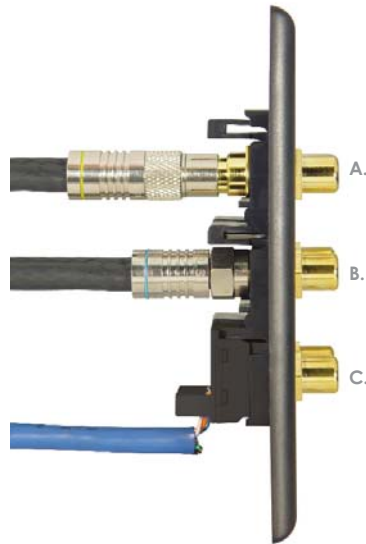

Save with ICC™

Pick and choose the right RCA modular connector to match connectivity requirements!

A. For quick termination use a RCA female to female modular connector and a plug in male connector.

B. For more secure connection use our RCA to F-type modular connector with threaded rear connector.

C. RCA to IDC modular connectors allow both audio or component video signals to be carried over UTP cable; allows fewer types of cables to be run (CAT 5e recommended).

High definition component audio/video RCA modular connectors are designed for today's high definition A/V installations.

They are available in six (6) different insert colors, and four (4) housing body colors.

Configurable Faceplates

Configurable Angled Faceplates

Angled faceplates are designed with angled ports to provide strain relief for connecting purposes.

Connectors are available in various colors to assist in defining input/output types, connections, or line numbers.

Angled faceplate reduces the length cords extend out; as a result furniture can be placed closer to the wall.

Stainless Steel Faceplates

*Classic*TM

Save with ICCTM

Stainless steel faceplates do not rust or tarnish and offer durability and long lasting use in the kitchen or bathroom.

Modular connectors mount flush with the front surface of the faceplate, creating a smooth surface.

Helpful Tips: Want to test an alarm reporting device without disrupting service?

Snap-on Cover Bottom View

Problems can arise when contractors want to incorporate an alarm reporting device and tamper loop onto phone lines, yet need a way to test them without disconnecting the phone system. **When the alarm reporting device is not plugged in, ICC's surface mount jacks with shorting bar allows the phone line to maintain network connection with the plug removed from the jack.** The shorting bars are positioned between pins "1&4" and "5&8" that maintain system continuity when the plug is removed.

A/V Distribution Racks

Audio/Video Distribution System

Save with ICC™

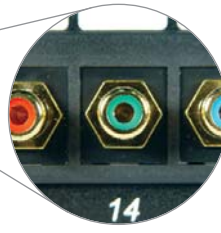

ICC offers contractors another solution for installing Audio/Video distribution racks to provide a solid backbone for supporting and organizing more complex home theater or multi-room audio/video distribution systems.

Horizontal and vertical cable management panels assist in organizing cables and offers a clean attractive appearance.

Want flexibility? Use ICC's blank multi-media patch panels. They can be customized with any ICC modular connector for voice, data, audio, video, and fiber optic connectivity. Makes adds, moves, and changes a snap!

Accommodates standard 19" rack mount electronic equipment; such as amplifiers, receivers, equalizers, DVD/CD players, stereo equipment, and much more... (Not available by ICC).

Perfect for large custom A/V home theater installations!

*NOTE: ICC does not offer electronic equipment shown in illustration to the left

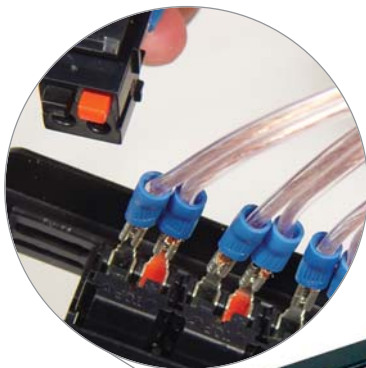

Save with ICC™ Install A/V distribution racks with blank multi-media patch panels!

Customize with ICC modular connectors!

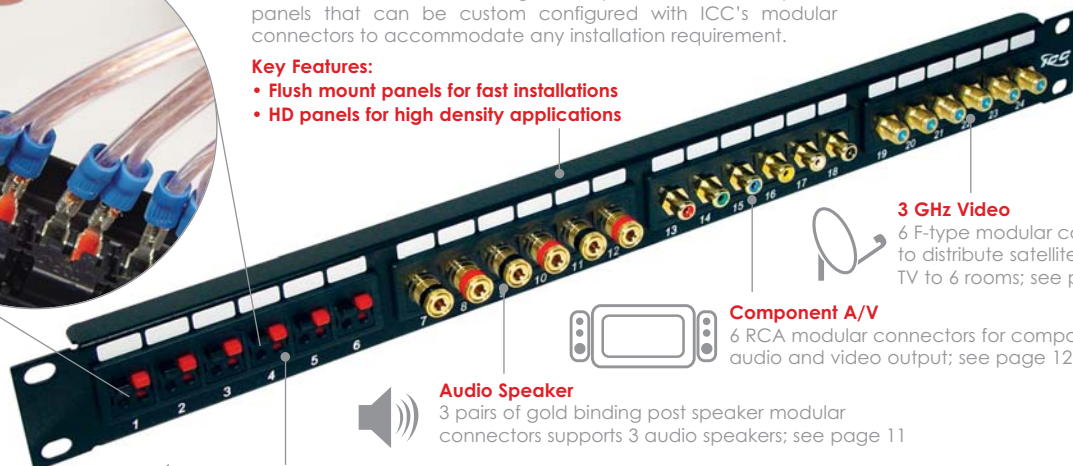

ICC offers flush mount and high density blank multimedia patch panels that can be custom configured with ICC's modular connectors to accommodate any installation requirement.

Key Features:

- Flush mount panels for fast installations
- HD panels for high density applications

Compression Tools

Save with ICC™ Want to make high quality custom length audio and video cables?

- Adjusting screw
- Release screw
- BNC adapter plate (F-nut holder located on other side)
- Adjusting shaft
- Connector insertion chamber
- Cable slot
- Ratcheting handle with release nut

Use the Right Setting Indicator!

Easy steps to compress connectors!

- Step 1.** Select suitable modular and/or compression connector.
- Step 2.** Strip coaxial cable and assemble with the connector. **NOTE:** For Quad-shielded type move loose braids backwards over the outer cable sheath.
- Step 3.** Select appropriate knob-screw for F-connector or flat plate for right angle BNC connector. **NOTE:** No knobs required for RCA or BNC connectors.
- Step 4.** Sit the connector into the base of the tool chamber and line up properly using the "setting indicator." **NOTE:** This allows you to set the connector within the base to allow enough room at the back end to move connector laterally.
- Step 5.** Turn the adjusting screw to tighten.
- Step 6.** Compress the connector by squeezing the handles until it fully cycles. **Note:** Ratchet will release the handle back to its original position if done properly.
- Step 7:** Remove your compressed connector and continue with your install.

Allow Ample Room from Base
